ACTIVE TEAT CREAM

Iodine based antiseptic teat cream with Manuka honey

For the treatment and protection of cracked and chapped teats in dairy cows

By law, the user must take due care, seeking expert advice if necessary, to avoid unnecessary pain or distress in the treated animal when using the product in a manner other than as directed on the label.

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: **Maximum Residue Levels for Agricultural Compounds.**

4610-005

DIRECTIONS FOR USE

Use immediately after milking. Any residual cream must be removed prior to milking. Teats should be thoroughly cleaned prior to the application of Active Teat Cream. Massage gently into the teats or udder, ensuring complete coverage of any sore or chapped areas. Active Teat Cream will not taint milk when used as directed.

HAZARD

Skin and eye irritant. Harmful to aquatic life. Read label and safety data sheet before use. Wash hands thoroughly after handling. Avoid release to the environment. If skin irritation or rash occurs get medical advice/attention.

STORAGE

Store in a cool place away from direct sunlight. Storing at temperatures in excess of 25°C will significantly reduce the shelf life of this product. Store tightly closed when not in use.

DISPOSAL

Dispose of product or empty containers safely. Avoid contamination of natural waterways. May be disposed of in landfill or incinerator.
